Appl. No. 09/981,635 Restriction Requirement dated April 23, 2007

identifier to first and second sequence of data. The Examiner additionally stated that the

respective inventions of Groups II and I are related as combination and subcombination.

Further, the Examiner stated that the combination as claimed does not require the

particulars of the subcombination as claimed because parsing of first and second data

types does not rely upon pre-defining token identifier to first and second sequence of

data.

The examiner finally concludes that these inventions are distinct and states the

search required for Group I is not required for Group II.

In view of the Examiner's requirements, Applicant makes the required election.

Respectfully submitted,

Date: April 23, 2007
